or those in the process of implementing a team into the practice.

This three-credit-per-hour group learning program has been certified by the College of Family Physicians of Canada for up to 48 Mainpro+ credits. The program consists of in-person learning sessions, action planning, and integrated learning packages.

The program is designed to be adaptable, flexible, and streamlined. Sessions are 2.5 hours long and can be tailored to reflect physicians' practice needs. Physicians are encouraged to include all members of their practice team, and sessions are kept focused and interactive by including a maximum of 20 participants.

Once doctors and their team members complete the program, in-practice coaching and support is provided to help them implement what they have learned.

For more information, doctors are encouraged to contact their PSP Regional Support Team, or email psp@doctorsofbc.ca.

GPSC Team-Based Care Reference Guide

The GPSC has curated a list of links to tools and resources that support doctors to develop and lead practice teams, including templates, sample documents, and planning guides. These resources are made available by the GPSC (Practice Support Program and Divisions of Family Practice), the Ministry of Health, and stakeholder organizations.

Resources are categorized as follows:

- Practice management (compensation, job descriptions samples, practice tools, privacy and legal, and patient medical record).
- In-practice coaching and education.
- Frameworks.
- Patient engagement.

For more information about these team-based care supports, email gpsc@doctorsofbc.ca.

college library

Keep current and carry on

Keeping up-to-date with your reading and research is a challenge at the best of times. The College Library provides both self-serve and full-service ways to access the articles you want. Self-serve options start with online access to more than 6000 journals. Search by title from the Library's Books and Journals web page (www.cpsbc.ca/library/search-materials/books-journals) or use the teal buttons or full-text links that appear in your database search or

in the list of articles sent to you in a literature search.

Another self-serve option is the Read by QxMD app. Use this mobile app to create a feed of the most recent articles from influential evidence-based journals or follow specific journals by title. Full-text articles are only a click away, and for titles not available through the College Library's subscriptions there is an in-app order form. Visit the Apps and Audiovisual web page (www.cpsbc.ca/library/search-materials/audiovisual) for instructions on how to access the Read by QxMD app.

In addition to content from the College Library's subscribed journals, we

are able to access a variety of no-cost, copyright-compliant sources on your behalf. Most articles can be sent to you in 1 working day from when you place an order. College registrants may place article requests, general requests, and literature search requests by filling out an order form through the Make a Request web page (www.cpsbc.ca/library/services-hours/make-request).

The Library also provides a table of contents service to help you keep current. Contact the Library at www.cpsbc.ca/library-requests to provide us with a list of titles or to discuss the many ways we can help you keep up with the current literature.
