

whose families had rejected them. The grief she experienced with every patient death was apparent even 35 years later when she related her experiences from that time.

Lindsay coped with her disease with fortitude and grace, not telling most friends and family about her condition until shortly before she died so they wouldn't worry about her. She never complained or shed a tear and expressed gratitude for every caring gesture made to keep her comfortable. Lindsay was a wonderful woman, wife, mother, and physician who will be missed terribly.

Lindsay's family expresses their deep appreciation to Dr Chelsey Lane, the BC Cancer Agency staff, and the palliative care team for their compassionate care. In lieu of flowers, donations in Lindsay's name can be made to Médecins Sans Frontières, whose brave work Lindsay always admired.

Latest curated reading list: Planetary health

Awareness and assessment of social determinants of health are important to ensure high-quality patient care, but it can be daunting to find information sources to ground one's practice in evidence. The College Library has curated several reading lists to this end, with the newest list recognizing the importance of environmental and climate change on patient health and medical practice, collating resources focusing on planetary health.

In British Columbia, climate crises such as 2021's summer heat dome and catastrophic flooding in the fall have highlighted how rapid and unpredictable environmental change can directly affect patient health and well-being. The planetary health list includes current

articles, guidelines, online and physical books from the College Library's collection, and high-quality websites encompassing topics such as heat-response planning, mental distress as a result of climate change, and changes in patterns of vector-borne disease.

In addition to resources supporting patient care, the planetary health reading list has information about sustainability in medical practice. Links to articles that discuss suggestions for environmental sustainability applicable to the family practice office, as well as sustainable surgical practices, may be found here.

To view this and other reading lists, such as race and health equity and trauma-informed care, visit www.cpsbc.ca/registrants/library/reading-lists. College registrants can also request more specific literature searches on planetary health-related topics, or on any other desired subject, via email to medlib@cpsbc.ca or the literature search web form at www.cpsbc.ca/registrants/library/make-request. ■
