The College Library offers the Clinical Handbook of Psychotropic Drugs (CHPD) in two online volumes—one pertaining to adults, and another for children and adolescents. The CHPD contains authoritative drug information based on the latest evidence, gathered from large clinical trials to case reports discussing rare adverse effects. The information is presented in concise reviews and color-coded tables for ease of use at the point of care. A range of clinicians from psychiatrists to family practitioners can benefit from the CHPD.

Each section in the handbook addresses a drug class (e.g., SSRIs), presenting information on drugs within that class at a glance; a variety of treatment options can be quickly scanned to select the best course of action for the patient. The volume devoted to children and adolescents addresses the dosage needs and unique effects that drugs have on that age group.

The CHPD is searchable for specific drugs, and both volumes contain off-label uses for each drug, interactions, nondrug treatments such as bright-light therapy, and printable patient information.

The CHPD is edited by a Canadian team of clinical pharmacists, pharmacologists, and physicians. Canadian-specific prescribing information in the CHPD is particularly valuable given that most psychopharmacology publications assume an American readership.

Both volumes of the Clinical Handbook of Psychotropic Drugs are available online on the College Library’s website, on the Point of Care and Drug Tools page: www cpsbc.ca/library/search-materials/point-of-care-drug-tools (login required: current CPSID and password).

Contact the College Library if you require further assistance. Phone: 604 733-6671, email: medlib@cpsbc.ca, online request form: www cpsbc.ca/library-requests.

In 1997, a young doctor heard the frustrations of colleagues forced to retain patient records for years after practice closure. Together with his buddy, they founded RSRS to offer Canadian physicians compliant record storage and practice closure assistance.

Twenty years later, our 50 dedicated associates have assisted more than 2,000 physicians with secure storage for over 2 million Canadians.
